Precipitation probability					
70%	70%	40%	20%	20%	60%

Forecast for Sunday 12 Dec 2021

Weather: Cloudy with outbreaks of rain, heavy at first but becoming lighter and dying out in the afternoon. One or two bright intervals are possible in the afternoon. A band of rain will arrive from the west late in the evening. Southerly gales or severe gales developing in afternoon and evening.

Chance of cloud free mountain/hill tops above 800m: 10%. Best chance in afternoon over far north and northeastern hills.

Visibility: Very poor at height with areas of low cloud and fog down to lower slopes in the morning. Cloud bases rising to 500 or 600m in the afternoon and becoming more broken across far north and northeastern hills. Below the cloud, hazy, occasionally a few km in rain or drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A damp day with poor visibility over most hills but drier in the afternoon. Note the winds strengthening through the afternoon with severe gales or storm force winds on the tops later.

Forecast for Monday 13 Dec 2021

Weather: Rain and strong winds easing overnight. A dry start but thicker cloud and outbreaks of rain and summit snow will spread up from the south. Becoming dry again during the evening. Details of this remain uncertain.

Maximum wind: South or Southwest 50mph gusts 70mph in early hours, decreasing to 10-15mph by morning.

Chance of cloud free mountain/hill tops above 800m: 20% at midnight, becoming 90% by morning but deteriorating to 20% as rain or summit snow spread north.

Visibility: Poor on the tops overnight. Good visibility to start the day with summits expected to be clear. Deteriorating as rain or summit snow arrive with cloud bases lowering to 400 or 500m.

Temperature: **Valleys:** Plus 4C rising to 7C.
At 800m: Plus 1C.
Freezing level: Above summits at midnight, falling to 900m by morning.
